Developed and marketed by Autodesk, AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers. Before AutoCAD was introduced, most commercial CAD programs ran on mainframe computers or minicomputers, with each CAD operator (user) working at a separate graphics terminal. AutoCAD is also available as mobile and web apps. A number of add-ons allow for customizing AutoCAD's functionality. Some allow users to create custom keyboard shortcuts, for example. Others allow users to add their own graphics elements, like equations and glyphs. Versions AutoCAD is a desktop application that runs on personal computers, CAD-capable workstations, and CAD-capable digital-measuring instruments and viewing devices, including (but not limited to) CAD-capable 2D plotters and 3D CAD workstations, laser printers and plotters, and more recently, tablets and smartphones. Each release comes with a number of updates, and users can purchase the latest version for upgrades at no cost. The application is also offered as part of the AutoCAD subscription model. Each release of AutoCAD also is accompanied by a new printer driver that works with that release. Now press the Generate Key button (it is located on the bottom right side of the Autocad toolbar), then wait a few seconds to get your 16-digit key. If you don't have Autocad, you can follow the link below: Comments and Suggestions I highly recommend AutoCAD 2007 and Autodesk Autocad. I use to use AutoCAD 2000. As a result, I had this problem. AutoCAD 2007 came out when I was trying to figure out how to change to 2000 format. When you open an.dwg, it automatically opens in 2007 format. Also, in Autocad 2007, you can change the file format as well. When I first tried to find a solution, I tried the first two solutions posted below and it worked for me. They say that "Newer Autodesk products are using the auto-embedded key. This key is embedded in the product, so you can't extract it from the trial." If you are doing the trial, then I would say it is easier to go with the solution that @Jouni put forward. This solution does not work for me when I have problem. My problem is when I go to the 'Remove License Code' button, I got the below error. Also, when I try to generate a key from the website, there is no button to generate a key. I run a company and I have autocad 2007. I have a license key but the problem is when I open an instance, it automatically opens in 2007 format. How do I generate a key to match the version? Thanks for reading! Reply May 27, 2008 4:35 am AIRic Hello, I'm having the same problem, and I've been trying to solve it for the last four hours. I tried the method on the message board that @Jouni put up, but it didn't work. I also tried the link that's posted in the thread, but it doesn't show the button I need.
