Keymacro is a free and simple utility to help you create and use macros for Microsoft Word. The program enables you to quickly create macros that automate tasks that normally require multiple steps, such as finding and replacing text in a document, rearranging a group of words or inserting text into a specific place in a document. You can also use it to create text-only macros, enabling you to insert commands into Microsoft Word documents. You can save them and then use them in any new documents or even load them into Microsoft Word documents. Moreover, the application is very easy to use, providing a short and comprehensive guide that tells you how to configure and use the program. Keymacro requires Microsoft Word to be installed on your computer and it does not come with an installer. It is possible to run the program from a CD, USB drive or network drive, but it is recommended to install it on your desktop or hard drive to use the program more effectively. Moreover, it is necessary to be connected to the Internet or to use a local network to access the program's help file and to update the software. You can run the program in various languages, including English, German, Dutch, French and Portuguese. Inserting text into a document with Keymacro is very easy. Once you have launched the application, you can create and configure a new document. It is then necessary to select the "Insert Macro" option in the "Insert" menu or choose the "Insert Macro" button. You will then have to select the macro you wish to use. You can select one from a list, or load a file with macros from your hard drive. You can also create a new macro from scratch. You can select either the "Macro" option or the "New Macro" option. You can also choose the content of the macro, as well as the location where the macro is inserted and the target document. Selecting the "Show Macro" button will display all the macros that have been created, enabling you to save them. There are also a number of functions that you can use to create macros in a document. For instance, you can select the "Find Text" option and then choose which text to be found. You can also choose to replace one text or replace all the selected text, or find a range of text. You can also find words or strings of text that are 1d6a3396d6
