Binkdx9 Surface Type 4 Download Rar.Q: how to get max value of a column in sql I have a table which contains 2 columns: number and name. I want to get the max number of a name and the corresponding name. Something like: Number Name 2 A 3 B 4 C 5 A The output will be: Number Name 3 B I'm using mysql 5.5.31. A: SELECT DISTINCT MAX(Number) as MaxNumber, Name FROM TableName GROUP BY Name MOSCOW, September 1. /TASS/. The preliminary figures for the fourth quarter of 2016 have been presented by Andrey Makarov, the head of the Federal Tax Service's statistics department. "Russia now has a \$99 billion debt, which is growing by 2.2% per year," he said. According to him, the decline in the country's current account is the main reason behind the debt growth. "Our debt is mostly registered in short-term credits. Russian current

account revenues in the fourth quarter grew by 3.4%, while the country's debt service expenses increased by only 2.2%. This is a negative balance equal to \$500 million," he said. According to Makarov, Russia's debt continues to grow due to large annual expenditures related to military modernization and rising energy prices, which are assumed to continue. "The total debt of Russian companies grew by 3.5% in the first nine months of 2016, to \$23.2 trillion. The main debtors are state and municipal authorities, their subsidiaries and pension funds," he said. Last year,

properties of the muscular nociceptor in ten
patients with spastic torticollis. Interpretation
of evoked electromyographic (EMG) activity is
difficult in spastic conditions such as unilateral
torticollis. Studies have shown that peripheral
denervation causes increased EMG activity,
but it has not been established how this is
related to the typical EMG findings in
spasticity. Ten patients with spastic torticollis
were studied by means of EMG of the
sternocleidomastoid muscle. The

characteristics of the activity were interpreted from the total of 52 recordings from 18 muscle fibres in 8 patients. Further, the EMG activity was recorded from the opposite muscle in the clinically unaffected side (n = 8). Using the same method as in previous studies
